T30TTT, Western Kiribati –update March 1

Dom 3Z9DX informs that preparations continue for the **T30TTT** Rebel DX Group DXpedition to Tarawa. He mentions they will be active from North Tarawa with 1 x SSB station, 1 x CW station and 9 x FT8 stations. Dates yet to be firmed up, but either mid-March or third week of March.

3B7M St Brandon –update March 1

Logs are updated. About 35K QSOs in the log. Yesterday, the team finally built all antennas. 3 x Spiderbeams for HF and verticals / VDAs for other bands. They have big electrical problems. Generators are overheating. At noon, it's almost 40C in the sun and 32 in the shade. The power supply cable from the generator room to the ham shack has burnt out. Team had to fix the replacement cable. There's often terrible rain and storms and that's why there are so many operation outages. From today, team will focus more on low bands. FT8 on 80m will operate on 3567 kHz. YL Sisa is doing a lot of QSOs on 10m SSB with Ruda OK2ZA. The team is in good health.

9U4WX Burundi –update March 1

On March 1st at 05:42z, **9U4WX** went QRT. After lots of complications and costs, Elvira and I managed to get 3 transceivers and 6 antennas into the country. 9U4WX made almost 28K QSOs (11K unique) on CW and SSB. 146 DXCCs and 6 continents, 34 CQ Zones and 41 ITU Zones achieved. With 100 watts it was very hard to be heard well, especially on the low bands. Still, 600 QSOs were made on 80 meters. Listening opportunities were limited and difficult made by very strong atmospheric QRN disturbances with frequent bursts.

3Y0J, Bouvet Island –update

The Marama arriving at Cape Town, South Africa.

VU4T Andmand Island –update

Team report they are almost done with the preparation work and are excited for the trip. If everything goes to plan, they should arrive on site at 1000Z on March 2nd and setup completed by noon. Depending on the internet situation, they will upload QSOs on Club Log as soon as possible. LoTW uploads will take some more time and will be done as soon as approvals are received.

FT8WW Crozet Island –update February 28

Unfortunately, the QO-100 equipment Thierry was using is now broken. There will be no more satellite activity from now on. Latest log update here - 42K QSOs so far.

FO/AA7JV Marquesas and Tuamotu

Active as both **KH7Z/MM** ([6m grids across the Pacific](#)) and **AA7JV/MM** (on low bands), currently George & Mike, KN4EEI are heading towards the Galapagos islands having recently left Cocos (TI9) island where they unfortunately could not obtain a license in time.

They plan to head to the Marquesas islands, arriving around March 18, staying until March 30. They will put ashore a small DXpedition with three stations: 2 x 100W FT8-only remotely operated stations and a full power locally operated CW/SSB station that will be on the air from 160-10 meters. The remotely operated stations will be on 80 to 6 meters. After FO/M, they will operate from the Tuamotu islands as **FO/AA7JV**, probably until April 5.

Once departing FO-land they intend to sail to E5 (Cook islands) and then onto American Samoa (KH8)
